

## Instruction to Authors

### About the Journal

The Nigerian Journal of Neuroscience (ISSN 1116-4182, <https://doi.org/10.47081>) is a publication of the Neuroscience Society of Nigeria (NSN) and publishes research papers in the broad field of neuroscience. It is available online: <https://www.nsn.org.ng/journal/>. Papers on the entire nervous system, with at least three experiments, will be considered. Review and invited articles will be initiated by the Editor-in-Chief. The journal will consider publishing full papers of oral and poster presentations at her annual conferences. The Journal will endeavour to process manuscripts from the time of receipt of submission to publication within the shortest possible time. Authors are advised to follow the instructions for submission to minimise delays in the publication process. The frequency of publications will be at least one volume per year. Each volume may have additional issues depending on the number of accepted manuscripts after the peer-review process.

Papers are considered for publication on the understanding that authors include: A statement of institutional ethical approval for the research; Statement of conflict of interest (if any); Statement of the authors' contribution; Statement that the manuscript has not been published and is not going to be considered for publication elsewhere. In the cover letter, authors should certify that neither the manuscript nor its main contents have already been published or submitted for publication in another journal.

Published articles are now licenced under Creative Commons Attribution 4.0 (<http://creativecommons.org/licenses/by/4.0>), which permits use, sharing, adaptation, distribution, and reproduction in any medium or format, as long as appropriate credit is given to the original author(s) and the source(s).

### Journal Format

The manuscript should be written in font size 11 and double-spaced using the Arial font type. Only e-copies of the manuscript are accepted. A4 paper e-copies with margins of 30 mm are accepted for submission. The quality of the images (if any) must meet the standards of the journal and be editable. All pages should be numbered consecutively in the bottom right corner, beginning with the title page. Groupings for the experiments must be named (i.e., "groups 1, 2, or A,

B" is not acceptable). Rather, it should be control (X and Y groups), depending on what the research entails. All manuscripts must be written using British English spellings.

### Submission and Fees

Only e-copies of manuscripts are acceptable and can be submitted online through the journal website or as a single file sent through the email address [editor.njn@gmail.com](mailto:editor.njn@gmail.com). A cover letter should accompany every manuscript. The pages should be numbered in sequence, starting with the title page. All submitted manuscripts must be accompanied by a statement of ethical board approval for the study in the Materials and Methods section. A processing fee is payable upon acceptance for publication of each submitted manuscript. Once a paper is reviewed and accepted, a publication fee will be charged, and payment will be received before the paper is published. These fees will be determined by the editorial board from time to time. Authors are kindly requested to confirm the current submission and publication fees before the submission of the manuscript. Hard copy printing of colour images or figures now attracts additional costs for the authors; this is not applicable to the online publication.

### Title Page

The title should be concise, with 15 to 20 words. This should be accompanied by a short, running title of not more than 50 characters (including spaces). The names of authors and institutional affiliations should be provided. The format for the author's names should be first name, middle name (if any), and surname. The name, contact address, e-mail address, and phone number of the corresponding author should be clearly indicated. Authors are encouraged to provide, in addition, a consistent digital identifier such as an ORCID ID, Publons ID, or Web of Science Researcher ID.

Authors are expected to carefully consider the list and order of authors before submitting their manuscript and provide a definitive list of authors at the time of the original submission. Any addition, deletion, or rearrangement of author names in the authorship list should be made only before the manuscript has been accepted and only if approved by the Editor-in-Chief. To request such a change, the Editor-in-Chief must receive the

following from the corresponding author: (a) the reason for the change in the author's list; and (b) written confirmation (e-mail, letter) from all authors that they agree with the addition, removal, or rearrangement. In the case of the addition or removal of authors, this includes confirmation from the author being added or removed.

Only in exceptional circumstances will the Editor-in-Chief consider the addition, deletion, or rearrangement of authors after the manuscript has been accepted. While the editor considers the request, publication of the manuscript will be suspended. If the manuscript has already been published in an online issue, any requests approved by the editor will result in a corrigendum.

### Abstract

The abstract should be a double-spaced, single-continuous paragraph and not longer than 250 words. This should include an introductory sentence, the aim of the study, a brief summary of materials and methods, results of significance, and a conclusion. The abstract should not contain any references, tables, figures, or undefined abbreviations. A maximum of six key words should also be provided.

### Manuscript Proper

The manuscript should contain the following sections, or subsections: Title page; Abstract page; Introduction, Materials, and Methods; Results; Discussion; Conclusion; Grants and Financial Support; Conflict of Interest; Acknowledgement(s); Authors' contribution; and References in that order.

### Paragraphs and Headings

Each paragraph should be longer than a single sentence but not longer than one manuscript page. The levels of headings should accurately reflect the organisation of the paper. All headings at the same level should appear in the same format.

### Abbreviations

Unnecessary abbreviations should be eliminated and any necessary ones explained. Abbreviations in tables and figures should be explained in the table notes and figure captions or legends.

### Statistics

All Greek letters, especially the most common mathematical symbols, need to be identified in the manuscript. All non-Greek letters that are

used as statistical symbols for algebraic variables should be in italics.

### Units of Measurement

The journal adopts the International System of Units (SI) or metric system except for measurements of time, which have no metric equivalents.

### Author Contributions

For transparency, authors are encouraged to submit an author statement outlining their individual contributions to the paper using the relevant credit roles: conceptualization, data acquisition, data analysis, methodology, resources, supervision, validation, visualisation, roles/writing (original draft), and writing (review and editing). Authorship statements should be formatted with the authors' initials and credit role(s).

### References

All references should be cited both in text and in the references list. Only published or 'in press' articles from journals, books, and published reports should be listed. The journal also requires that authors cite any publicly available data on which the conclusions of the paper rely. Data citations should include a persistent identifier, such as a DOI, in the reference list using the minimum information recommended by DataCite and follow journal style. Dataset identifiers, including DOIs, should be expressed as full URLs. The journal citing and referencing is in Harvard style. References should be cited in the text by name and year in round parenthesis with no punctuation between, for example (Daniel and Vincent, 1997).

All in-text citations should be listed in the references list at the end of the manuscript. In instances of more than six authors, only the first six authors should be listed, and subsequently, et al. should be used. Citations should be listed in alphabetical order. The cited journal titles should be written in standard abbreviated format.

### Tables and Figures

Tables and figures are to be incorporated within the manuscript as close as possible to where they are first mentioned and numbered with Arabic numerals. There is only one table or figure per page. Every table column should have a heading. Only the top, second, and last horizontal lines should be in the table. All vertical table lines should be omitted. Each figure must be labelled with the correct figure number and short title (figures for a particular experiment should be grouped together as one, differentiated by letters).

All figures and tables mentioned in the text must be numbered in the order in which they are mentioned. The acceptable file format for figures is jpeg. The editorial office may request a TIFF format of a figure after the paper is accepted. The grey scale must be a minimum of 300 dpi.

### Permission to use Published Material

It is entirely the responsibility of the authors to obtain permission from other journal publishing houses to use copyrighted materials. Articles are published open access and are under the Creative Commons Attribution 4.0 International Licence, which permits use, sharing, adaptation, distribution, and reproduction in any medium or format, as long as the appropriate credit is given to the original author(s) and the source, provide a link to the Creative Commons licence, and indicate if changes were made. The images or other third-party material in articles are included in the article's Creative Commons licence, unless indicated otherwise in a credit line to the material. If material is not included in the article's Creative Commons licence and your intended use is not permitted by statutory regulation or exceeds the permitted use, you will need to obtain permission directly from the copyright holder. To view a copy of this licence, visit <http://creativecommons.org/licenses/by/4.0/>.

### Galley Proof

Once a manuscript is accepted for publication, the galley proof of the manuscript will be sent to the author for final corrections before publication. At this stage, no major revision will be allowed, or the authors will incur an additional cost. Publication is first done online, with a pdf copy sent to the corresponding author. The printed copy is made available thereafter.

Payments can be made into the journal's account with details as follows:

**Name:** Nigerian Journal of Neuroscience

**Acct. Number:** 2027303612

**Sort Code:** 011013316

**Bank:** First Bank Nigeria PLC

### Advertisements

The Journal will publish advertisements from corporate organisations in the private sector and government departments. Enquiries on advertisements should be directed to the Editor-in-Chief.

### Subscriptions

Individual Members: ₦ 5,000

Non-Members: ₦ 7,000

Institutions: ₦ 10,000

International: \$ 50
